

Ply-Seal® Joint Systems

For Architectural Applications

The **Ply-Seal® Joint System** consists of **Ply-Seal®**, a waterproof joint seal, and a two-part industrial adhesive that will bond to most any substrate to provide a flexible waterproof joint system. **Ply-Seal®** can be color matched to adjacent substrates in standard colors: black, gray, and beige.

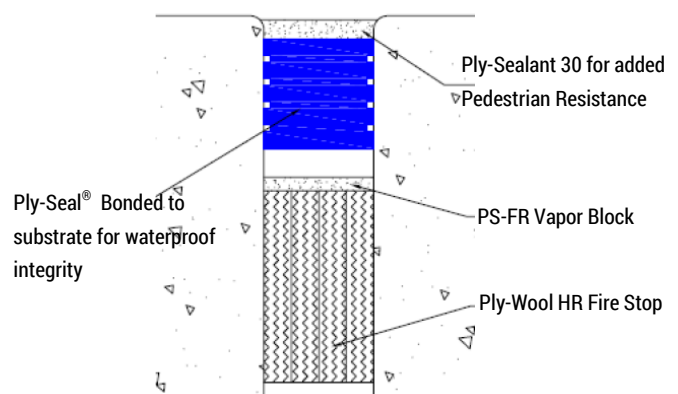

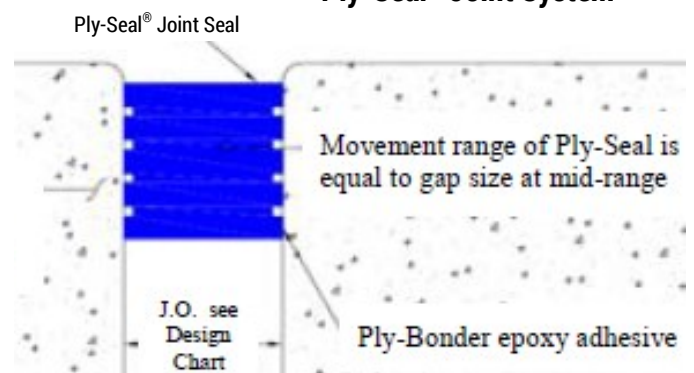

Ply-Seal® Joint Systems are easy to install with minimal downtime, making it a convenient joint system.

Applications

- Sound barriers walls and panels
- Rail platforms and loading stations
- Reflective pools and tunnels
- Buildings and commercial structures
- Fire-stop applications

Ply-Seal® Joint System

ANSI/UL 2079 System # FF-D-1023 Class II

3-Hour Fire Stop with Added Waterproof Joint Seal
