Item	1	2	3	4	5 a-d	6 a-e	7	8	9
Part Name	Polyset FP Gun Assembly	Dual Cartridge	Mixing & Spray Tip	Blue Air Tube x2	Air Fitting Assembly	Pistons; 1:1, 2:1, 3:1, 4:1	Push to Connect	Shoulder Strap	Handle Grip
Part Number	260099	See Below	See Below	260099-TUBEX2	260099-AIRKIT	9914-6	9913-8	9913-9	9913-10

The **Polyset FP Gun** is designed to facilitate the installation of the **Ply-Krete® Joint Systems**. Designed as a pneumatic dispensing unit, it dispenses, mixes, and sprays our products from dual cartridges onto the prepared surfaces, eliminating the need to “paint” on the primer or bonder. This gun drastically saves labor and product cost while reducing installation time. Priming a joint may be reduced from 60 minutes to 6 minutes without mixers or brushes.

Each **Polyset FP Gun** Assembly is shipped with all the above items shown except the cartridge and spray tips, which are sold separately. Yield of one cartridge is about equal to one gallon of brush applied product, saving significant product costs and time.

Dual Cartridges currently available for use with the **Polyset FP Gun**:

Product	Volume & Ratio	Part Number	Tip
Ply-Primer	1500 ml 1:1	260960	Spray Tip
Ply-Bonder	940 ml 4:1	260164	8612-2
Ply-Krete® Plug	1125 ml 2:1	312761	Mix Tip 8611-2

*Please contact us for project specific requirements. Other materials may be available.

The **Polyset FP Gun** will dispense 1:1, 2:1, 3:1, and 4:1 ratio materials. It will mix and spray as it dispenses the product. With the optional airless mixing tips, it can dispense without spraying for those products that do not require a spray application.
