

## Miscellaneous Installation Supplies

**Polyset Spray Gun & Cartridges**

The **Polyset Spray Gun** is ideal for the application of **Ply-Primer** and **Ply-Bonder**. It will mix and spray apply these products with speed and minimal cleanup.

**Ply-Krete® "H"-Drill**

Mixing **Ply-Krete®** is made easier using this mixer and Helical mixing paddle.

The Mixing Station is also convenient as it helps keep the 5-gallon pail from spinning. Using these together will save labor and time when mixing the **Ply-Krete®** products.

**Ply-Krete® Accelerator** is an optional item used in colder temperatures to allow **Ply-Krete®** to set faster. One syringe added to each part A, just prior to mixing in the field, in 50F temperatures will reach the physicals listed in the data sheet at 75F. minimal cleanup.

A 7" **coarse grinding disc** is used to quickly grind the 1/4" bevels on the **Ply-Krete®** edges. Available in #8 or #16

**Ply-Seal® Install Tool**

**Ply-Seal®** is made easier using a pair of these simple tools especially for larger seals. Maximum recommended **Ply-Seal®** width is 50% larger than gap width at time of installation.

The **Ply-Seal® Splicing Irons** are used to field-weld Ply-Seal joint seals. Available in 115 or 230 volt.
